

ATLANTIC WATER TECHNOLOGY LTD

PRODUCT INFORMATION

A-102

| | |
|----------------------------|--|
| GENERAL DESCRIPTION | A-102 is a caustic based product designed to increase alkalinity in water systems. |
| USES | As an addition to steam boilers to improve precipitation of hardness salts and give an anti-corrosive environment. A-102 is also suitable for addition to open and closed cooling circuits to increase pH and reduce the corrosion potential of the water. |
| COMPATIBILITY | A-102 is compatible with system components at the recommended circuit levels. Care should be taken and good testing and control measures implemented where systems contain zinc, copper and aluminum components. Water of high pH will be aggressive to these. |
| APPLICATION DATA | <p>A-102 is applied to low pressure steam boilers (up to 25 bars) to maintain a caustic alkalinity of 250-350 ppm (mg/L) expressed as CaCO₃.</p> <p>With medium pressure boilers lower caustic alkalinity is required for optimum boiler water conditions. With high pressure boilers caustic alkalinities should be controlled at very low levels in the order of 2-10 ppm (mg/L) CaCO₃, depending on boiler pressure. Local engineers will advise accordingly.</p> |
| TECHNICAL DATA | <p>Appearance : colorless liquid</p> <p>pH as supplied : 10-12</p> <p>Specific Gravity : 1.25± 0.01</p> <p>Flash Point : non flammable</p> <p>Packing : 25 and 200 liter containers</p> <p>Transportation : class 8 (corrosive)</p> |

ATLANTIC WATER TECHNOLOGY LTD

HEALTH AND SAFETY INFORMATION

A-102

| | |
|-------------------------------|--|
| POTENTIAL HAZARDS | Causes severe burns, particularly harmful to eyes, skin and mucous membranes. |
| HANDLING & STORAGE | Keep out of reach of children. Avoid contact with skin and eyes. Avoid extremes of temperatures. Replace cap securely after use. Store away from acids. Recommended storage limit - 2 years. |
| PROTECTIVE EQUIPMENT | Wear protective overalls, rubber gloves and eye/face protection. |
| SPILL PROCEDURES | Small spills: Flush to drain with plenty of water. Large spills: absorb on dry powder or earth and dispose of as hazardous waste. Do not discharge directly into rivers or water courses. Observe local disposal regulations. |
| FIRST AID | EYES: Rinse immediately with plenty of water for at least 10 minutes and seek medical attention SKIN: Rinse immediately any contaminated clothing. Rinse affected areas immediately with plenty of water. Treat as a chemical burn. Failure to treat even small areas immediately may result in an irritant dermatitis. Contaminated clothing should be laundered before re-use. INGESTION: Wash out mouth thoroughly and drink plenty of water. Do not induce vomiting. Seek medical advice immediately. |
| OTHER INFORMATION | At the recommended in-use concentration A-102 is non-hazardous. |
