

ATLANTIC WATER TECHNOLOGY LTD

PRODUCT INFORMATION

A-260

A-260

GENERAL DESCRIPTION

A-260 is phosphino carboxylic acid base treatment designed as highly effective scale control agent, antifoulant and dispersant.

USES

A-260 is specially designed for application to prevent scaling of Reverse Osmosis membrane.

COMPATIBILITY

A-260 is compatible at the recommended levels with the membrane and other component of Reverse Osmosis plants and system. A-260 can be used in system using chlorine and sodium meta bisulfate.

APPLICATION DATA

A-260 should be dosed on continuous basis either directly from the container or diluted with clean low hardness water such as softened or distilled quality. The product should be dosed according to the recommendation of our Consultant Engineer.

TECHNICAL DATA

Appearance	:	Pale yellow liquid
pH as supplied	:	<2.0
Specific Gravity	:	1.07
Packaging	:	25 and 200 litre containers
Transportation	:	non-hazardous
