

ATLANTIC WATER TECHNOLOGY LTD

PRODUCT INFORMATION

A-542-M

A-542-M

**GENERAL
DESCRIPTION**

A-542-M is a broad spectrum microbial control agent based upon bronopol.

A-542-M is suitable for open and closed cooling circuits combining good slime penetration with highly efficient biocidal activity. Its penetrating abilities effectively eliminate "hideout" which forms a focus for microbial multiplication. It is useful for legionella species.

**PHYSICAL
PROPERTIES**

Appearance	:	Light turbid
Specific gravity	:	1.042 ± .001
pH as supplied	:	5.6 ± .1
Flash point	:	non-flammable

**TECHNICAL
INFORMATION.**

A-542-M dosage will be specified by our Consultant as per the site conditions.

Normal application is by shot dosing once or twice per week depending on the degree of fouling and seasonal variations.

Dosing may be either manually or via metering dosing pump.

PACKING:

A-542-M is available in 25 Litre or 200 Litre containers.

TRANSPORTATION:

Non hazardous.
